NurseRevalidation is online e-Portfolio software combined with Allocate’s service to provide organisations with a comprehensive solution for nurse and midwife appraisal, revalidation and education.
Allocate Software provides the most widely used workforce management, governance and compliance tools in UK healthcare. Our customers include over 80% of all NHS providers in the UK, as well as independent health providers.

The creation of our NurseRevalidation solution is a direct response to demand from our customers that have asked us to build an end-to-end solution that takes advantage of their existing investment with us.

To meet this need we have evaluated existing nurse revalidation technology, our NurseRevalidation solution is powered by technology by Premier IT.

All of our solutions are backed by fully integrated service and support that take customers from preparation to implementation and beyond to benefits realisation.
