ALLOCATE

A happier & more engaged workforce

Improve retention – Boost morale – Become an employer of choice

Happier, more engaged employees are more likely to stay at your organisation longer. This also impacts directly the quality of the care they will deliver to your residents and clients.

Optima will help you:

- Improve **staff engagement and empowerment** through use of mobile technology
- Increase **fairness** for shift and leave allocations, **compliance with regulations**
- **Provide fairer contractual terms, accurate pay** with fewer errors or delays

Be confident on pay outcomes

Our Award Interpretation engine has been **specially designed for the Australian Healthcare and Aged & Community Care sectors.**

Optima automates processes from rostering to award interpretation to payroll; reducing manual processing while mitigating the risk of errors and enabling greater visibility and reporting across your organisation.

Allocate's rostering solutions generate over \$20 billion in pay from actuals every year.

Deliver optimal care

Increase safety - Improve quality

Your residents and home-based clients are at the centre of the care you deliver, so it makes sense that staff providing that care should be scheduled around their requirements.

It can be challenging to continually adapt the workforce to meet those complex and ever-changing requirements, but Allocate can help you match staffing levels to the needs of your residents and home-based clients.

Optima will help you:

- Design safer staffing aligned to **real resident and client needs**; improving the quality of care you provide
- Optimise your rostering, leading to enhanced **continuity and quality of care**
- Create savings and a better client experience by requiring **fewer agency staff** to deliver care

Control your costs

Improve efficiency – Reduce costs – Optimise your resources and budget

Staff is the primary cost in Aged & Community Care. To reduce these costs without compromising care quality, you need access to information enabling you to inform better decision. Optima - our comprehensive workforce management system incorporating a rostering solution - caters for the specific needs of the care sector and allows you to access this information. This enables you to deploy the right people, to deliver the level of care required at an optimal cost against budget.

Optima's reporting allows you to track financial performance against budgets. It also gives you visibility into rostering practices, while highlighting areas of improvement such as agency spend, overtime, overstaffing and staffing based on real resident and client needs.

Optimising the cost-quality equation

Optima clients have enjoyed:

- Reduced agency spend between **8-15%**
- Overtime Spend down by **2-9%**
- Decreased temporary staffing usage by **2-15%**
- Sick leave cut by **2-4%**

Optima provides improved safety for residents and home-based clients

Allocate: Rostering solutions for Aged and Community Care

Allocate is enabling the delivery of safe and effective care at optimal cost, by helping you to **roster your staff efficiently and effectively**.

Optima delivers proven, needs-based, end-to-end staff management centered around a consolidated view of all staff groups and all staff types, whether permanent, part time, casual or agency.
