

## SAFE CARE

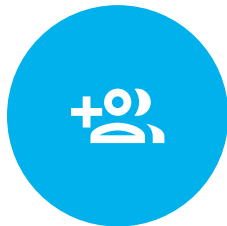

Unlock productivity and safeguard patient safety with acuity-based daily staffing

Effectively manage safe staffing levels that are matched to patient demand, to avoid both over and under staffing. Live visibility of staffing provides key metrics to help you operationally make decisions on resource, making it easier to be responsive to the changes in demand or staff availability.

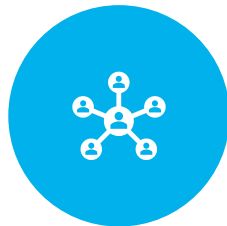

### Patient Census

Ability to record patient censuses and levels of care to calculate required care hours CHPPD (Care Hours Per Patient Day)

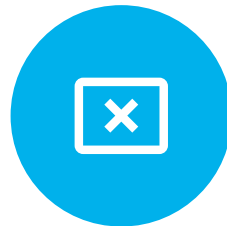

### Staffing Level Visibility

Provides visibility of staffing levels across the whole hospital

### Redeployment

Better enable Nurse Managers to flex and redeploy staff in line with patient demand

### Avoid Agency Use

Redeploy staff safely with full sight of how this will impact services elsewhere

### Reporting

Reporting of key staff metrics (on planned and actual care hours)

**NHS**  
Nightingale Hospital  
Yorkshire and the Humber

“Redeployment of substantive to avoid agency spend has contributed to significant reduction in temporary staffing spend for the organisation... approximately £30,000 per month”

Adam Ruddock  
Temporary Staffing Manager  
North Tees and Hartlepool NHS FT

**Releases approximately 4 hours per week of ward manager's time from administration.**

**Real-time staff deployment based on patient demand and acuity for safer and more efficient staffing levels.**

Used by over 200 health and care organisations around the world, SafeCare is empowering site managers, nurse unit manager, ward managers and nurses to flex resources as necessary to make the best possible use of substantive staff and safeguard patient safety.

### Features

- Record a census of patient numbers, acuity & dependency – typically three times a day
- See staffing status across many dimensions, including hours short/excess, missing skills, missing patient census, care hours per patient day (CHPPD) and cost of shift
- Track attendance and sickness of staff
- See all staff rostered on a shift, including their skills.
- Redeploy staff safely with full visibility of skills and impact elsewhere
- Track attendance and sickness staff
- Redeploy staff safely with full visibility of skills and impact elsewhere
- Request casual or agency cover if needed

### Benefits

- Red Flags quickly identify issues to enable Nurse Managers to flex and redeploy staff in line with patient demand
- See real time staffing status of all wards, services and locations in a single view
- View live staffing status by hours short/excess, missing skills, missing patient census
- Reduce temporary personnel and avoid unnecessary agency use
- Identify investment and training opportunities
- See all staff rostered on a shift, including their skills

**Delivers Safer Care for Staff and Patients**
